AGM AUTOMATION | EST. 1996

SERVICING W.A | RESIDENTIAL & COMMERCIAL

The AKTX4 remote control transmitter is designed to deliver unparalleled security for all domestic and commercial applications.

Features:

- 69 bit encrypted data transmission guarantees security.
- Each transmitter is uniquely coded and cannot be replicated.
- Self learning receiver technology stores up to 340 unique transmitters.
- Can be used to replace any existing remote control system.
- Convenient size allows attachment to key-ring or under dash placement with velcro.
- Easy to add new transmitters with the push of a single button.
- Four channel transmitter allows for maximum flexibility.
- 433.92MHz crystal locked transmitter frequency immune from interference caused by baby monitors, 27MHz CB radio etc.
- All transmissions immune from code grabbing and code scanning techniques as often used by ever resourceful thieves.
- In built transponder circuitry allows transmitter to be used with an optional active transponder receiver when the on board battery is flat or missing.
- No price penalty for far superior technology.

Applications:

- Garage doors, automatic gates.
- Remote arming and disarming of security alarms.
- Personal emergency transmitters.
