

High security, commercial electric deadbolt for automatic gates

★★★★★
PREMIUM QUALITY

MADE IN ITALY

Suitable for swing & sliding gates

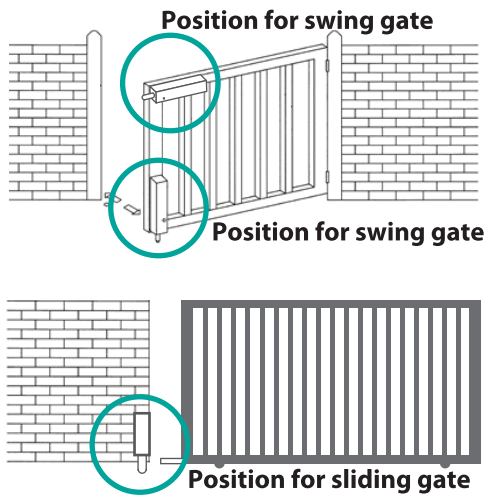

- Operated using a relay driven from the gate control panel warning lamp output, the bolt is powered for the duration of the gate stroke and drops down again when power is removed (spring action)

Product Instructions

- Secure anti-jemmy, 20mm diameter steel bolt with 15mm end taper
- Facilitate centering of the strike aperture with a 60mm extension (50mm throw)
- Cylinder key override (supplied) - only requires a hole in the ground

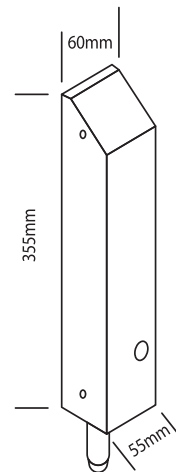

Weatherproof all-metal construction with black powder coated galvanised steel cover

TECHNICAL DATA

- Lock body in steel with anti-corrosion treatment
- Mechanical lock with 4 throws and European style cylinder (through-hole both sides)
- Weather protection of cylinder bore by means of rubber seal
- Ø20x60 mm with deadbolt anti-jemmy device with secure positive deadlocking in closed position
- Power Supply: 24 Vdc.
Peak current: 5A, Holding current: 750/900 mA
